CHEMICAL GEOLOGY
INCLUDING
ISOTOPE GEOSCIENCE

Contents Volume 132, 1996

Special Issue: Chemical and Biological Control on Mineral Growth and Dissolution Kinetics, American Chemical Society Meeting, April 1995, by L.L. Stillings (Guest-Editor)

Preface 1

Research papers

How microbes influence mineral growth and dissolution
H.L. Ehrlich 5

Laboratory evidence for microbially mediated silicate mineral dissolution in nature
W.J. Ullman, D.L. Kirchman, S.A. Welch and P. Vandevivere 11

Mechanisms for chelator stimulation of microbial Fe(III)-oxide reduction
D.R. Lovley and J.C. Woodward 19

Iron acquisition from hydrous Fe(III)-oxides by an aerobic *Pseudomonas.* sp.
L. Hersman, P. Maurice and G. Sposito 25

Application of atomic-force microscopy to studies of microbial interactions with hydrous Fe(III)-oxides
P. Maurice, J. Forsythe, L. Hersman and G. Sposito 33

Microbial colonization and weathering of silicates in a petroleum-contaminated groundwater
P.C. Bennett, F.K. Hiebert and W.J. Choi 45

Biologically versus inorganically mediated weathering reactions: relationships between minerals and extracellular microbial polymers in lithobiontic communities
W.W. Barker and J.F. Banfield 55

Promotion of chemical weathering by higher plants: field observations on Hawaiian basalts
M.F. Cochran and R.A. Berner 71

Rates of feldspar dissolution at pH 3–7 with 0–8 m*M* oxalic acid
L.L. Stillings, J.I. Drever, S.L. Brantley, Y. Sun and R. Oxburgh 79

Effects of organic acids on the dissolution of orthoclase at 80°C and pH 6
R.E. Blake and L.M. Walter 91

Redox reactions in hydrocarbon clastic reservoirs: experimental validation of this mechanism for porosity enhancement
M.A. Shebl and R.C. Surdam 103

Influence of humified and non-humified natural organic compounds on mineral dissolution
M. Ochs 119

Reactive surface area control of the dissolution kinetics of biogenic silica in deep-sea sediments
P. Van Cappellen 125

Weathering rates as a function of flow through an alpine soil
D.W. Clow and J.I. Drever 131

Short- and long-term weathering rates of a feldspar fraction isolated from an arid zone soil
D.L. Suarez and J.D. Wood 143

The effect of iron content and dissolved O_2 on dissolution rates of clinopyroxene at pH 5.8 and 25°C: preliminary results
A.R. Hoch, M.M. Reddy and J.I. Drever 151

Kinetics of the formation and the dissolution of nickel surface precipitates on pyrophyllite
A.M. Scheidegger and D.L. Sparks 157

Preliminary quantification of metal selenite solubility in aqueous solutions
S. Sharmasarkar, K.J. Reddy and G.F. Vance 165

Mineralization of bacterial surfaces
S. Schultze-Lam, D. Fortin, B.S. Davis and T.J. Beveridge 171

Phosphatidic acid liposomes as mineralizing surfaces: kinetics and energetics
B.L. Kraus and M.A. Crenshaw 183
Controlled biomineralization of magnetic minerals by magnetotactic bacteria
D.A. Bazylinski 191
Bacterial reduction of selenite to elemental selenium
C. Garbisu, T. Ishii, T. Leighton and B.B. Buchanan 199
Understanding the genesis of nonmarine calcite deposits through quadrupole mass spectrometric analysis of fluid inclusion gases
B.D. Newman, D.I. Norman, M. Gundimeda and S.S. Levy 205
Effect of phosphonate inhibitors on calcite nucleation kinetics as a function of temperature using light scattering in an autoclave
R.G. Jonasson, K. Rispler, B. Wiwchar and W.D. Gunter 215
Gypsum growth in the presence of growth inhibitors: a scanning force microscopy study
D. Bosbach and M.F. Hochella Jr. 227
Seasonal changes in silica deposition in hot spring systems
N.W. Hinman and R.F. Lindstrom 237

Contents Vol. 132 247
